

18 A car has a 12 V battery. When the engine is started, the current in the starter motor circuit is 43 A.

How many electrons flow past a point in the circuit in one second?

- A** 7.5×10^{19} **B** 2.7×10^{20} **C** 5.4×10^{20} **D** 3.2×10^{21}
