

21 The I - V characteristics of four different conductors are shown in the graph.

Three of the conductors are a metallic conductor at a constant temperature, a semiconductor diode and a filament lamp.

Which row matches each graph to a conductor?

	metallic conductor at constant temperature	semiconductor diode	filament lamp
A	X	Z	W
B	Y	W	X
C	Y	W	Z
D	Z	Y	X
