		$V = 4.07 \pm 0.05$ V (2 d.p.)
3	**D**	Consider a *v*-*t* graph. Area under the *v*-*t* graph is the displacement. If ¾ of total area is covered in 1.00s, Then the total area is covered in 2.00s.  ¾ of total area in 1.00s
4	**C**	Gradient of *s*-*t* graph = velocity
