		on the car are not acting on different bodies, and are not of the same type of force.
3	**D**	The unit of the quantity representing the area under the stress – strain graph is the product of the units of stress and strain respectively. Hence, $\text{units} = \dfrac{\text{kg m s}^{-2}}{\text{m}^2} \times \dfrac{\text{m}}{\text{m}}$ $= \text{kg m}^{-1}\ \text{s}^{-2}$ $= \text{J m}^{-3}$ $\because \text{J} = \text{kg m}^2\ \text{s}^{-2}$
4	A	Both cars meet at time $t = 0$ and $t = T$. Hence, the displacement of both cars at
