		$= 683$ N
5	**D**	Let tension in string and spring be T_1 and T_2 respectively. Consider horizontal equilibrium, $T_1 \sin\theta = T_2$ --- (1) Consider vertical equilibrium, $T_1 \cos\theta = mg$ --- (2) (1)/(2): $\tan\theta = \dfrac{T_2}{mg}$ Weight of mass, $mg = \dfrac{T_2}{\tan\theta}$ $= \dfrac{kx}{\tan\theta}$ $= \dfrac{25 \times 0.060}{\tan 36^\circ}$ $= 2.06$ ≈ 2.1 N
6	**C**	Gravitational field strength at Earth's surface
