Answer B

34) $$\frac{V_s}{V_p} = \frac{N_s}{N_p}$$ and $I_sV_s = I_pV_p$

first transformer output $V_{s1} = \frac{N_s}{10} \times V_p$; second transformer output $V_{s2} = \frac{N_s}{30} \times V_p$

$V_{s2} : V_{s1} = 1 : 3$

Hence, $I_{s2} : I_{s1} = 3:1$

Answer B

$$\left(6.63 \times 10^{-34} \times 3.0 \times 10^{8}\right)$$
