

- 23 Two electrical components are connected in series with an ammeter in the circuit shown. The cells are identical.

Which circuit arrangement and level of temperature gives the largest reading on the ammeter?

| | S_1 | S_2 | temperature |
|---|--------|--------|-------------|
| A | closed | open | high |
| B | closed | open | low |
| C | open | closed | high |
| D | open | closed | low |
