

**2** What is **not** an example of Newton's third law of motion?

- A** the force backwards by a car on the ground and the force forwards by the ground on the tyres of a car
- B** the force backwards by a propeller on water and the force forwards by the water on the propeller of a boat
- C** air molecules pushing backwards on a moving car and the car pushing forwards on the air molecules
- D** the weight of a car downwards and the normal contact force upwards on the car
