

1 %age uncertainty = $\frac{0.02}{2.16} \times 100 = 0.9\%$ imply reading precise.

%age error = $\frac{0.08}{2.08} \times 100 = 4\%$ imply reading not accurate.

Answer: B

2 $\frac{1}{\quad} + \frac{1}{\quad} = \frac{1}{\quad} : f = 42.1 \text{ mm}$
