

Answer C

17)

$$PV = NkT$$

$$N_1 k = PV/T \text{ -----(1)}$$

$$N_2 k = 2PV/(5T) \text{ -----(2)}$$

$$\text{Let (2) / (1) } \Rightarrow N_2/N_1 = 0.4$$

Fraction of molecules remaining = 0.4, hence fraction of molecules escaped = 0.6

Answer C
