

Suggested Solutions to 2013 H2 Physics G.C.E. A Level Examination Paper 1

- 1) using kinematics equation, $s = \frac{1}{2}gt^2$. Rearranging it to $t^2 = (2/g)s$, where the gradient is $2/g = 0.204$. g is calculated to be 9.804 ms^{-2} . Hence value of g is accurate. However, the graph shows that points are scattered about the line of best fit, indicating the presence of random errors. So, the values are not precise.

Answer A

- 2) A piece of A4 size paper is in the order of several grams
