

$$\begin{aligned}
 \mathbf{2} \quad \text{Average speed} &= (\text{Total distance travelled}) / (\text{Total time taken}) \\
 &= \text{Area under speed-time graph} / \text{Total time taken} \\
 &= \frac{\frac{1}{2}(40 + 70)(18) + \frac{1}{2}(18 + 24)(50) + \frac{1}{2}(30)(24)}{150} \\
 &= 16 \text{ m s}^{-1}
 \end{aligned}$$

Answer: D
