

Answer: C

- 38** Atoms are excited to a unstable state(P). Atoms spontaneously de-excite to a metastable state(Q) before emitting laser light by de-exciting to the stable state(R).

Answer: A

- 39** ${}_{92}^{235}\text{U} + {}_0^1\text{n} \rightarrow {}_{56}^{144}\text{Ba} + {}_{36}^{90}\text{Zr} + 2{}_0^1\text{n}$
