

Answer: C

- 9** Work done by gas = Area under PQ = $600(5 - 3) \text{ J} = 1200 \text{ J}$
Work done on gas = Area under RS = $400(5 - 3) \text{ J} = 800 \text{ J}$
Work done by gas during the cycle = $(1200 - 800) \text{ J} = 400 \text{ J}$

Answer: A

- 10** Tensile forces act on the string along its axis
