

		the speed of the ball v is constant. From $\omega = \frac{v}{R}$ $\omega = \frac{v}{R}$
11	D	$a = r\omega^2$ $20(9.81) = 7.0\omega^2$ $\omega = 5.3 \text{ rad s}^{-1}$
12	A	loss in $K.E.$ = gain in $G.P.E.$
