

		0.0 + 2.0
8	B	By Newton's third law of motion, Magnitude of force exerted by jet of water on wall = Magnitude of force exerted by wall on jet of water By Newton's second law of motion, Force exerted by wall on jet of water = Rate of change of momentum of jet of water

No.	Answer	Solution
		(which is the change in momentum of the water stopped per unit time)
9	A	Anticlockwise moment = Clockwise moment
