

No.	Answer	Solution
24	B	For option B, when X is at the top in contact with Y, the p.d. between X and Y is zero. When X is at the midpoint between the two resistors, the p.d. between X and Y is $\frac{R}{2R} \times 6.0 = 3.0 \text{ V}$ Option A: vary between 3.0 V and 6.0 V Option C: always 6.0 V Option D: vary between 3.0 V and 6.0 V
25	B	0.0500
