

		$\therefore J = \text{kg m}^2 \text{ s}^{-2}$
4	A	Both cars meet at time $t = 0$ and $t = T$. Hence, the displacement of both cars at $t = T$ is the same. This means that the areas under both curves in the graph is equal, such that $P + Q + R = Q + R + S$ $P = S$
5	C	velocity of bicycle relative to car = velocity of bicycle – velocity of car
