

		Speed of X after collision is $0.33v$.
5	A	The weight is the gravitational force the Earth exerts on the brick. By Newton's 3rd law, the force paired with W is the force the brick exerts on the Earth. The support force S from the floor is the normal contact force the floor exerts on the brick. By Newton's 3rd law, the force paired with S is the contact force the brick exerts on the floor.
6	B	When hollow ball of mass m is suspended freely by newton meter
