

14	C	Option A is incorrect because there will be a resultant force on the object due to the leftward and downward forces acting on the object. Option B is incorrect because there will be a resultant force on the object due to the three forces acting on the object.

No.	Answer	Solution
		Option C is correct because the resultant force and resultant torque acting on the object are both zero. Option D is incorrect because there will be resultant torque on the object due to the couple of forces acting on the object.
15	B	energy
