

$\approx 7.4 \text{ J}$

18

C

Option A is incorrect because there is gravitational force on the satellite to provide for its centripetal force to keep it in orbit.

Option B is incorrect because the resultant force on satellite is the gravitational force acting towards the centre of the Earth.

Option C is correct about the satellite.

Option D is incorrect because the satellite is constantly accelerating due to it constantly changing direction in circular orbit with uniform speed about the Earth.
