

No.	Answer	Solution
1	C	$E = \text{constant} \times \frac{l^3}{T^2}$ $\frac{\Delta E}{E} = 3 \frac{\Delta l}{l} + 2 \frac{\Delta T}{T}$ $= 3(0.02) + 2(0.02)$ $= 0.10$ Percentage uncertainty in E is 10%.
2	D	units of work done = $\text{kg m}^2 \text{ s}^{-2}$
