

		$= 6.85 \text{ m}$
23	D	Current in $4.00 \text{ } \Omega$ resistor, $I_1 = \frac{2.00}{4.00} = 0.500 \text{ A}$ Current in $8.00 \text{ } \Omega$ resistor, $I_2 = \frac{2.00}{8.00} = 0.250 \text{ A}$ Current in $12.00 \text{ } \Omega$ resistor, $I_3 = \frac{2.00}{12.00} = 0.167 \text{ A}$ Current in the cell when every switch is closed $I_{\text{total}} = I_1 + I_2 + I_3 = 0.500 + 0.250 + 0.168$ $= 0.917 \text{ A}$

No.	Answer	Solution
24	B	An electron has mass, experiences gravitational force in a gravitational
