

		9.81 m s ⁻² , non-zero velocity horizontally but zero velocity vertically.
6	C	Distance travelled by the car while it is decelerating = area under $v - t$ graph during deceleration $= \frac{1}{2}(30 + 10)(25 - 10)$ $= 300 \text{ m}$
7	D	The hollow sphere has smaller mass than the solid sphere, hence has a
