

		$= 4.0 \text{ m s}^{-1}$
17	B	Positions X and Y are the antinodes. Distance XY is 5.0 cm. Wavelength = 10 cm From oscilloscope screen, period $T = 6 \times 0.050 = 0.30 \text{ ms}$ Frequency $f = \frac{1}{T} = \frac{1}{0.30 \times 10^{-3}} = 3.33 \text{ kHz}$
