

		left hand rule.
25	B	 The diagram illustrates the forces on a current-carrying wire in a magnetic field. A magnetic field B is directed into the page, indicated by a circle with an 'X'. A current-carrying wire Y is directed out of the page, indicated by a circle with a dot. A red arrow labeled $F_{X \text{ on } Y}$ points to the right from the wire, representing the magnetic force. A blue arrow labeled B_x points downwards from the wire, representing the magnetic field component.

Qn	Answer	Solution
		Using Right Hand Grip Rule, current in wire X (into the page) produces magnetic field B_X (downwards) on wire Y. Using Fleming's Left-Hand Rule, the force $F_{X \text{ on } Y}$ acting on Y (carrying current out of the page) by X is towards the right.
26	B	Option A: Incorrect
